

THUNDERHAWK

MINI-PLANT FOR CABLE RECYCLING

THUNDERHAWK

Efficient chopping line for small recyclers.

Just plug it in and
start recycling your cable scrap.

Very compact design, yet every
machine is easily available for service.
Robust like all REDOMA plants.

From Cable to Cash

Leading Manufacturer of Cable Recycling Plants Worldwide.

Turn-Key Plant – Thunderhawk Type A

Separator for High Purity End Products

*Very Robust
Rough Chopper*

*Strong and Reinforced
Granulator*

*Granulator Built for
Tough Conditions*

*Efficient Dedusting
System*

TECHNICAL SPECIFICATION

THUNDERHAWK (2 sizes):

- Guaranteed average infeed capacity*
- Installed power
- Average power consumption
- Transport volume (box container)

THUNDERHAWK A

200

30

25

1x20'

THUNDERHAWK B

330 kg/h

47 kW

35 kW/h

1x20' container

*) Average infeed capacities are based on household cable with copper content 45%. The purity of the copper is normally above 99.5%. With reservation for technical alterations.

THUNDERHAWK A: Very compact and economical turn-key plant. Suitable for small companies wanting to earn money from their scrap cable quickly, but without big investments in machinery. Manually fed. Can be extended as your business grows.

THUNDERHAWK B: Extended with a rough chopper, which increases the capacity by 70%. Low personnel requirements and high degree of automation. Efficient and profitable cable recycling. It can even process steel-armoured cable. Both THUNDERHAWK A and B

are PLC operated and can process copper as well as aluminium cable. **THUNDERHAWK – it is small, but big in performance!**
